IMAGINE...

crouching in the trees on a cool fall morning. The air is still. A light fog hangs over the grass. You shiver in anticipation. Suddenly, the air is pierced by the angry bugle of a massive six-by-six as he screams out his challenge!

The hunting terrain is one of the most important aspects of a hunt. The serene picturesque atmosphere at Echo Lake Big Game Hunts primes you for an exciting taste of wilderness!

There is ample poplar and spruce tree coverage without it being a forest. Rugged and challenging it is accessible by foot, 4x4 and ATVs.
